Step by step Facemask:

Step 1

Print the pattern. Note: select "full size" in the print settings. Pin the pattern to the folded fabric and cut out. Then pin the pattern to the lining fabric and cut out. There should now be 4 pattern pieces.

Step 2

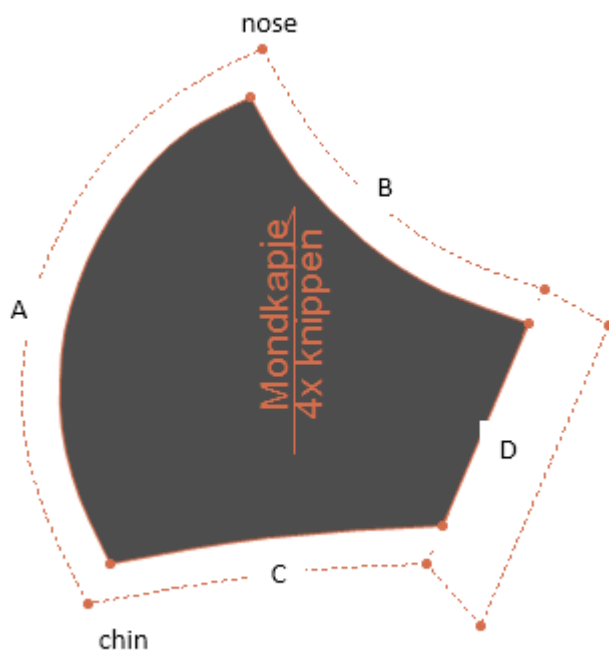

Stitch the round seam (A) of the fabric pieces together and then the round seam of the lining fabric together. Both with the top of the fabric together. Now you have a fabric front and a lining fabric inside. For woven fabrics, press the seams open on both pattern pieces.

Step 3

Sew the bottom (C) to lining and fabric together. Then sew the fabric and lining together at the top (B). Turn the mask inside out and iron it nicely into shape.

Step 4

Fold the outsides (D) inwards and make a tunnel seam and pull the elastic through the tunnel. Tailor the mouth mask by trying it on and cutting the elastic. Decide for yourself whether the elastics come around the ears or run along the back of the head.
